

# Wrap-Up

Ron Morrow

**Bruce**

**Manage what you have**

**Use imagination**

**Be flexible**

**Plan ahead**

**Opportunistic**

**Native warm season grasses**

**Not drought proof**

**Graze cool season grasses hard**

## Joshua

Regenerative management  
Soil food web---Building soil  
Contribution of animals

Balancing land performance and livestock performance  
Grow own wind break  
Dung beetles

Managing for chaos—timing (*season*), frequency  
(*recovery*), intensity (*severely grazed*)  
Industrial age

## Steve

Use more temporary fence  
Cows would rather graze than eat hay  
% calf crop—selling open? cows

## **Matt**

**Getting started**

**Learn, flexibility, all farms different**

**Select functional animals**

**nutrient cycling**

**cull cows**

**Let forage availability decide calving and weaning times**

## **Craig**

**Use forages more days of the year**

**Economic sustainability**

**(“shaggier”)**

## **Clint**

**Cattle with wildlife**

**ID limiting factors**

## **Karen**

High value pasture  
Phase 2 of the growth curve  
Rumen bugs  
Too mature—lignin  
Too much protein  
Sample what animals eat

## **Tony**

Feed profile and feed budget  
Road ditches

## **George**

Silvopasture a great option for Arkansas
