

**Kenny Simon** began his career with the University of Arkansas Division of Agriculture Extension in the fall of 2001. He has served in multiple roles, including county extension agent and program associate for Dr. John Jennings, and was promoted to Forage Instructor in 2022. Throughout his career, Kenny has worked closely with county agents to implement on-farm demonstrations and conduct multi-county research trials. His primary responsibility is providing leadership for the 300 Days of Grazing Program.

In addition to his Extension work, Kenny and his family operate a cow–calf operation in central Arkansas. This hands-on experience allows him to implement grazing practices from the program on his own operation while evaluating and testing new ideas and management strategies.
